PETITION PROTESTING TVA SUBSTATION & TRANSMISSION LINES

The signatures below represent our strong opposition to the TVA's Rutherford Power Supply Improvement Project taking place in our local communities throughout southeastern Williamson and southwestern Rutherford County. This project, consisting of a 50+ acre substation and dozens of miles of transmission lines throughout our pastoral countryside, is not welcome here.

For more information visit www.poweroutrage.org or contact The Courier at (615) 330-8757

Reasons for opposition are as follows:

1. **HEALTH*—**studies show the health of those in and around the proposed project will be negatively effected
2. **LAND VALUES**—**studies show land values of those in and around the proposed project will be negatively effected
3. **HOSTILE SALE**—TVA is prepared to force the sale of family farms and businesses for land it does not have easements on
4. **OTHER OPTIONS**—the other options TVA has dismissed have been dismissed for flawed reasons and estimates
5. **ENVIRONMENT**—the current option is the hardest on our environment, countryside, and families
6. **EFFICIENCY*****—TVA has failed to effectively pursue efficiency measures which could reduce/eliminate the need for the project
